PICTOGRAMS

materials and coatings

Stainless steels are notable for their corrosion resistance, which increases with increasing chromium content. Stainless steel's resistance to corrosion and staining, low maintenance, and familiar lustre make it an ideal material for many applications where both the strength of steel and corrosion resistance are required.

Made from leather that has a wonderful vintage look to it. The straps are hand stitched with a contrasting colour waxed made.

Cubic Zirconia (CZ) is a high-quality, lab-created gemstone designed to closely mimic the appearance of a diamond. Known for its brilliant sparkle and clarity, CZ is often colorless but can be produced in a wide range of colors to suit different styles and preferences. With a hardness rating of 8.5 on the Mohs scale.

2 YEARS INTERNATIONAL WARRANTY

Your Como Milano jewel is guaranteed in accordance with the terms described in the enclosed leaflet.

International Warranty

Como Milano creates unique and exclusive jewellery products by using carefully selected materials and enthusiastic and precise design. Our design team monitors the latest on-going trends in order to meet the highest customer satisfaction.

All our jewels are made of stainless steel (316L) which is hypo-allergenic. Some jewel items contain leather parts, we recommend to keep them away from water to ensure a much longer lifetime. On some items the steel is plated by a special cover and these materials can be sensitive to chemicals (eg. perfume) and external influences.
